

**California Code of Regulations
Title 17, Division 2**

FINDING OF EMERGENCY

These regulations are being adopted on an emergency basis for the immediate preservation of the public peace, health and safety, and general welfare, within the meaning of Government Code Section 11346.1(b).

DESCRIPTION OF THE FACTS WHICH CONSTITUTE THE EMERGENCY

The Department of Developmental Services (Department) receives funding from the federal government for reimbursement of supports and services received by consumers eligible to receive services under the Home and Community-Based Services Waiver (Waiver). To increase the federal funding to the State, the Budget Act of 2003 (AB 1765, Item 4300-001-0001) provides the authority for the Department to promulgate emergency regulations specifically for implementing proposals to increase federal funding to the State.

There are approximately 53,000 consumers who receive Waiver services based on the eligibility criteria set by the federal government. The proposed changes to the regulations would enable the Department to add respite services through the use of vouchers (vouchered respite) to the Waiver, thus increasing the federal funding the State receives from the federal government.

The State spent approximately \$77 million in fiscal year 2001-02 for vouchered respite and it is estimating that \$7.1 million in federal financial participation (FFP) can be obtained for the first nine months of 2004-05, and at least \$9.5 million annually thereafter, by adding this service to the list of billable services. However, such a Waiver amendment will require that the qualifications of those providing the vouchered respite services be comparable to others providing respite services, i.e., in-home respite workers employed by respite agencies and individuals vendored directly as in-home respite workers. The qualification that would have to be added to make vouchered respite providers' qualifications comparable to other respite providers is the requirement for Cardiopulmonary Resuscitation (CPR) and First Aid training.

Under the Department's Waiver, and in accordance with Section 4442.10(A) of the State Medicaid Manual, the Department agrees to assure that there will be financial accountability for funds expended for home and community-based services. The Department also agrees to maintain and make available to the U. S. Department of Health and Human Services, the Comptroller General, or other designees, appropriate financial records documenting the cost of services provided under the Waiver, in accordance with Section 2500.2 of the State Medicaid Manual. These documents are to include the following information for any individual hired by a service provider to provide a service utilizing a voucher: the individual's date of birth, social security number, address, and telephone number. This information would be used to verify that the delivery of service being purchased and the funds provided are used in a fiscally

responsible manner, in addition to confirming that the individual providing the service is 18 years of age or older.

Current regulations require vendors to maintain detailed records. The proposed changes will clarify the details of the records vendors are required to maintain per federal requirements.

Other proposed changes include extending the record retention period from three years to five years in order to comply with federal requirements; and, a copy of the vendor application is being removed from Title 17.
